“ YOU CAN'T USE UP CREATIVITY. THE MORE YOU USE, THE MORE YOU HAVE. ”

Maya Angelou

What does creative teaching mean to you?

Does technology kill creativity?

Or do we need to think “outside the box” as to what creativity means in a world of coding, automation and technology driven innovation?

Will you agree technology has always been a path to improving creativity?

Of course, Teaching outside the box while still ensuring students have grasped the necessary skills and knowledge they need can be a tricky balance to master.

Nonetheless, Creative teaching always comes through empowering learning experiences where we give our students the opportunity to inquire, explore and integrate technology in our day-to-day activities.

Bringing creativity and technology can be a powerful tool in teaching!
