

*Empower*  
**your team with  
personalised and  
collaborative learning  
experiences**

With Moodle Workplace, you can create a seamless learning culture and experience across devices so that employees can continually learn new skills and respond to the challenges of today and tomorrow.

# Enhance the employee learning experience

Moodle is an open-source platform which offers full control of the learning management system. This means that you can customise it with the features that are relevant and meaningful to your audiences and enhance your employee learning experience.

## Create seamless learning across devices

With our **Mobile App**, you will be able to provide a seamless learning experience across devices and enable your learners to fit learning around their life.

## Conduct change with an intuitive User Experience

You will be able to provide a strong **user experience** enabling administrators and users to effortlessly navigate the platform and perform the intended actions in a few clicks.

## Build your learning and compliance programs

**Programs** enable you to stay up-to-date with compliance as well as designing learning paths for your teams. You can also validate learning and compliance by issuing **certificates**.

## Manage centrally and delegate with ease

With **Multi-Tenancy**, you will be able to serve and manage multiple entities separately from a single installation with great flexibility and at a lower cost.

## Mirror your own organisational structure

With **Organisational Structure**, you can create your own discrete structure to mirror your real-life organisation and respond to the needs of your various user groups.

## Save time by automating your workflows

With **Dynamic Rules**, avoid the tedious tasks and easily create and manage automated rules for several groups of users. You can create learning experiences based on location, department, position, roles and other criteria for your users.

## Build and manage reports to suit your needs

With **Report Builder**, you can easily build and customise your own reports and track learners' progress and performance with little effort so that you can improve their learning experience as needed.

## Encourage employees to learn together

With our **social functionalities**, you will be able to create a learning environment where employees will collaborate. You will be able to engage specific communities of learners and improve the ability to collectively acquire skills and competencies.
