

#1 Mathematics Learning Platform. From Finland.

Eduten Playground is a gamified and AI powered digital learning platform developed at University of Turku, Finland. It **reduces teacher workloads**, **helps children learn faster** and gives **real-time analytics dashboards for teachers and education leaders**. It is fully aligned with the **local curriculums**.

Eduten Playground (available in Finland with the name VILLE) is the **most popular Finnish digital classroom tool**. More than **17,000 teachers** in **56% of all schools in Finland** have chosen Eduten Playground as the best tool to help students learn mathematics faster. Eduten Playground was recently chosen by **UNESCO** as the best tool in the world that enhances learning through artificial intelligence:
