Professional Teacher Education (Pedagogy qualification)

TAMK is one of the five Universities of Applied Sciences who are authorized to provide professional teacher qualification education in Finland. We offer up-to-date innovative pedagogy and localized know-how to global partners:

1) Professional Teacher Education (60 ETCS)

The professional teacher education is based on recent research in educational science and applies the principles of participatory pedagogy and methods of exploratory learning. The education provides the pedagogical qualification required of teachers in Finland.

2) Professional Guidance Counsellor Education (60 ETCS)

Professional guidance counsellor education emphasizes the student's own activity, shared production and assessment of information, and development of new practices. The education provides qualification to work as a study counselor in vocational education, universities of applied sciences, primary school, and high school.

3) Professional Special Needs Teacher Education (60 ETCS)

The professional special needs teacher education is based on inclusive pedagogy, which involves a reflective, inquisitive and development-oriented approach. Vocational special education training gives the qualification to work as a vocational special education teacher in vocational education and universities of applied sciences.

Early Childhood Education and Care Teacher Education (degree, qualification)

1) Bachelor of Health Care, with focus on Social Pedagogy (210 ECTS)

English taught bachelor's degree programme in social services, which provide qualification to work as kindergarten teachers

2) Early childhood education studies (60 ECTS)

English taught ECEC training which gives the qualification of an early childhood sociologist. The teaching is hybrid with onsite and online learning (Please see the video)

STEM Education (qualification, teacher training courses)

TAMK STEM Center provides training to enhance and upgrade knowledge and pedagogical skills of teachers and administrative staff. Delivered in English by Finnish experts in STEM pedagogy, principal and senior lectures working in engineering physics and mathematics.

Modules include: Digital tools in STEM/ Active engagement/ Learning analytics/ Flipped classroom/ Languaging in STEM/ Experiments in technology/ Assessment/ Learning by doing/ Computer aided measurement systems
