# R2T2

# MASTERCLASS

It is the year 2032. A meteorite has damaged an important power station on Mars and we need to assess the damage and restart the main generator. Thankfully, we have 16 robots on site. Each robot can be controlled from Earth by a team of engineers and space experts. Direct remote control is impossible at that moment. Therefore the robots must be programmed in advance by the experts on Earth to solve the task.

**R2T2 On-Line Masterclass**  
**V403: 6 Day Program**  
1.5hr morning x6 &  
1.5hr afternoon x6

----- Every 3 students will be provided with 1 Thymio Robot -----

# Thymio Robot Coding Workshop

Help students, any age, to master technology

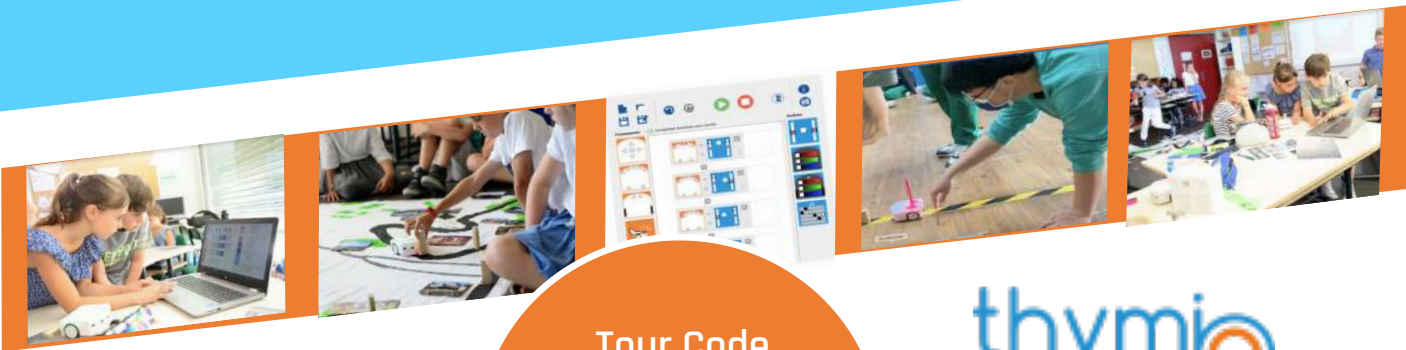

Ready to use, out of the box

Its 6 basic behaviours allow you to discover how it interacts with its environment.

Move blocks or write real code in 6 programming languages including Scratch and Python.  
Thymio makes it easy to start at any level!

Create your own universe

Program it. Personalize it. Creativity is the only limit!

Every student will be provided  
with 1 Thymio Robot
